

I claim:

1. The combination of a water-closet and a bidet, said combination comprising a main body, said main body including a first cavity, a second cavity and adjacent upper accesses for said cavities, said first cavity having a liquid outlet hole connected to an evacuation line through a siphon and a plurality of perimetral liquid inlet holes, said second cavity having a central liquid inlet hole and a liquid outlet hole, said liquid outlet hole offset from said central hole and connected to said evacuation line, said main body comprising a reservoir for liquid.
2. The water-closet and bidet combination of claim 1, wherein said main body comprises a single body and said combination further includes a single lid adapted to close on top of said cavities.
3. The water-closet and bidet combination of claim 1, wherein said first and second cavities are separated by a wall.
4. The water-closet and bidet combination of claim 1, further including a soap-holder arranged between said cavities.
5. The water-closet and bidet combination of claim 1, further including a mechanism for retaining and releasing said liquid from said reservoir.
6. The water-closet and bidet combination of claim 1, further including control means outside said main body for controlling entry of liquid into the second cavity.
7. The water-closet and bidet combination of claim 1, further including means for injecting hot air into said second cavity.
